What is Mental Health and Wellbeing?

Your mental health affects how you feel, think and act. It refers to your emotional, psychological and social wellbeing. Your mental health can change and fluctuate on a daily basis and over time, and can be affected by a range of factors. Just as it's important to look after your physical health, the same is true for your mental health. Your state of wellbeing affects how you cope with stress, relate to others, make choices, and play a part in your family, community, workplace, and among your friends.
